

Local Tree Trimming Firms that Will Provide Tree Chips to Residences

One of the best ways to reduce your yard's water consumption is to replace high-water consuming grasses and ornamental plants with native plants that are best planted in the fall before winter rains and surrounded by woody mulches to preserve moisture and reduce weed growth. Besides saving water, this will result in lower fertilizer bills, less time spent mowing, pruning, and maintaining fast-growing plants, fewer yard trimmings to handle, and more native birds and wildlife attracted to your yard. Creating a more sustainable landscape has now been made easier by the availability of a growing list of tree trimming firms that will deliver large loads of tree chips to your property at no charge.

Listed below are the ten private tree trimming firms that will deliver large loads of free tree chips. There is always an uncertain amount of delay in getting a delivery so this should be considered in your planning. The City of Glendale Parks Division allows residents to pick up loads of tree trimming mulch from behind Brand Library using their own vehicles and tools and at their own risk. Call Parks at 818-548-3738 or 818-548-2054 for more information. The best source of local information on native plants is the Theodore Payne Foundation in Sun Valley (818-768-1802).
