

**CONSTRUCTION NOTICE FOR  
SLURRY SEAL**

**Fiscal Year 2013-14 Slurry Seal and  
Pavement Repair Program**

**General Contractor: Sequel Contractors, Inc.**

Part of the City's annual maintenance effort is the Street Slurry Seal Program. Street Slurry involves the application of crack sealing and emulsion aggregate slurry over the existing pavement. Slurry seal prolongs the service life and restores the appearance of the pavement and prevents further deterioration of the pavement.

The work will involve: **Crack Sealing or Installation of Asphalt Rubber Aggregate Membrane (ARAM), and Application of Slurry Seal.**

While this operation is being performed, please remember:

- Access to your street will be restricted between 7:00 AM and 5:00 PM, when Slurry Seal is being applied and to allow for cure time. The areas being sealed cannot be driven or walked on during this time and will be closed to traffic.
- Traffic may be allowed on the lanes not being slurry sealed. Please use caution when driving through the work zone.
- Street parking is not allowed and signs will be posted accordingly at least 30 hours in advance of parking enforcement. Please adhere to the parking restrictions posted.
- Parking will be available within a reasonable distance to your house.
- When access is restricted, detours will be set up to help you reach your destination.
- If Slurry Seal application occurs on trash collection day on your street, trash will be picked-up as normal.
- Refrain from using irrigation, sprinklers or watering on the day of slurry seal.
- Driving on wet slurry seal will damage your vehicle and the newly placed slurry seal.

We appreciate your cooperation and understanding while we work to improve your City.
