**RE: 1311 San Luis Rey Drive  
Design Review PDR 1521089**

Dear Mr. Noravian,

On March 28, 2016, the Director of Community Development, pursuant to the provisions of the Glendale Municipal code, Title 30, Chapter 30.47, **APPROVED WITH CONDITIONS** your design review application to add 157 square feet to the first floor and a new 498 square foot second story addition to an existing 1,362 square foot split-level house with attached two-car garage. In addition, the exterior colors and materials are proposed to change. The second floor will be setback 15 feet from the front property line in keeping with the minimum front setback requirement. The property is located on a 15,500 square foot lot in the RIR (Restricted Residential) Zone, Floor Area Ratio District II. The new unit will be compatible with the existing neighborhood in terms of mass and scale, architectural style and materials located at **1311 San Luis Rey Drive**.

#### **CONDITIONS OF APPROVAL**

1. Show the location of any light fixtures on elevation drawings. Provide a product cut sheet for review by staff.
2. Show the location of all gutters and downspouts on exterior elevations for final review by staff.
3. Provide a detailed landscape plan for the front yard and side planter, showing the location, species and size of planting materials for review by staff. Use drought tolerant plants.

#### **SUMMARY OF THE DIRECTOR OF COMMUNITY DEVELOPMENT'S DECISION**

##### **Site Planning**

The proposed site planning is appropriate, as modified by any proposed conditions, to the site and its surroundings for the following reasons:

- The overall site planning is minimally changed as only 122 square feet is being added to the side of the first floor and the existing split-level building, garage, and driveway will remain.
- The new 498 square foot second story addition steps back 15 feet from the front property line.
- The existing stairs leading to the front door, garage, and driveway will remain.
- Planters and additional landscaping will be added.

##### **Mass and Scale**

The proposed massing and scale are appropriate, as modified by any proposed conditions, to the site and its surroundings for the following reasons:

- The various roof forms and heights create an interesting roofline that helps break up the overall massing.

### **Building Design and Detailing**

The proposed design and detailing are appropriate, as modified by any proposed conditions, to the site and its surroundings for the following reasons:

- The design of the addition maintains the overall character of the existing house in form.
- The architectural style and details are consistent throughout.
- Existing windows and new windows will be wood and are appropriately placed.
- The white, grey and black colors are appropriate for the style of the house and are compatible with the residences in the neighborhood.
- The existing roofing material and new roof area will be replaced with a similar material of a different color.
- The roof forms of the addition will be compatible with the existing roof form.

### **RESPONSES TO COMMUNITY INPUT RECEIVED DURING COMMENT PERIOD**

1. A letter of support was received from the Verdugo Woodlands West Homeowners Association.

**This approval is for the project design only. Administrative Design Review approval of a project does not constitute compliance with the Zoning Code and/or Building Code requirements.
