**RE: 1621 Capistrano Avenue
ADMINISTRATIVE DESIGN REVIEW CASE NO. PDR 1703121**

Dear Mr. Der Sarkissian:

On April 25, 2017, the Director of Community Development, pursuant to the provisions of the Glendale Municipal Code, Title 30, Chapter 30.47, **APPROVED** your design review application for the construction of an approximately 930 square-foot, one-story addition at the side and rear of an existing 1,900 square-foot, one-story single-family residence with an existing detached two-car garage on a 13,875 square-foot lot, zoned R1, Floor Area Ratio District I located at **1621 Capistrano Avenue**.

CONDITIONS OF APPROVAL:

1. Provide a section drawing of the proposed windows to show new windows will be appropriately recessed within the walls.

SUMMARY OF THE DIRECTOR OF COMMUNITY DEVELOPMENT'S DECISION

Site Planning – The proposed site planning is appropriate, as modified by any conditions, to the site and its surroundings for the following reasons:

- The proposed addition to the side and rear of the existing one-story residence will not alter the overall site planning of the lot.
- The addition infills the existing recessed portions at the west side of the house and maintains the existing interior setback of 5'-2" on the west side.
- There is no change to the existing 30'-0" front setback.
- There is no proposed change to the existing wood fence at the front of the property.

Mass and Scale – The proposed massing and scale are appropriate, as modified by any conditions, to the site and its surroundings for the following reasons:

- The addition's roof, building mass, and proportion are consistent with the existing volume of the house and surrounding neighborhood.
- The alteration to the front elevation is minimal and includes a new closet on the southwest corner of the front elevation along with a new roof of the west side addition.
- The new gable and shed roofs are consistent with the existing roof form.

- There is no change to the overall building height (approximately 20 feet) since the ridgeline of the new roof will be approximately 12 inches lower than the existing roof ridge.

Building Design and Detailing – The proposed design and detailing are appropriate, as modified by any conditions, to the site and its surroundings for the following reasons:

- The proposed architectural style and details including wall finish (stucco), horizontal wood siding at the gable ends, and new roof material are consistent with the existing residence.
- The new shingles will match the existing shingles.
- The new windows throughout the house will be aluminum-clad wood casement or fixed windows with external grids. A condition of approval is included to provide a section drawing of the proposed windows to show an appropriate recess within the walls.
- The existing decorative window shutters on the south (front) and east elevations will remain unchanged.
- There are no proposed changes to the existing brick chimney on the east elevation and to the brick veneer wainscot on the front and east elevations.

This approval is for the project design only. Administrative Design Review approval of a project does not constitute compliance with the Zoning Code and/or Building Code requirements. Please refer to the end of this letter for information regarding plan check submittal.
