

**PROPOSED
NEGATIVE DECLARATION**
FY 2018-2019 CDBG, ESG and HOME Programs

<p>The following Negative Declaration has been prepared in accordance with the California Environmental Quality Act of 1970 as amended, the State Guidelines, and the Environmental Guidelines and Procedures of the City of Glendale.</p>	
Project Title/Common Name:	FY 2018-2019 CDBG, ESG and HOME Programs
Project Location:	Glendale, Los Angeles County, California: Glendale is located northeast of downtown Los Angeles. It is bounded by the cities of Burbank, Pasadena, La Canada Flintridge and the Los Angeles communities of Tujunga, Eagle Rock and Los Feliz.
Project Description:	Action Plan prepared by the City of Glendale Community Services and Parks Department for the fiscal year 2018-2019 Community Development Block Grant (CDBG), Emergency Solutions Grant (ESG), and HOME programs. See attached Action Plan for full description.
Project Type:	<input type="checkbox"/> Private Project <input checked="" type="checkbox"/> Public Project
Project Applicant:	Maggie Kavarian, Senior Community Services Supervisor City of Glendale Community Services and Parks Department. 141 N. Glendale Avenue, Room 202 Glendale, CA 91206
Findings:	The Director of the Community Development, on March 12, 2018 , after considering an Initial Study prepared by the Planning Division, found that the above referenced project would not have a significant effect on the environment and instructed that a Negative Declaration be prepared.
Mitigation Measures:	No mitigation measures are necessary.
Attachments:	Initial Study Checklist
Contact Person:	Philip Lanzafame, Director of Community Development City of Glendale Community Development Department 633 East Broadway Room 103 Glendale, CA 91206-4386 Tel: (818) 548-2140; Fax: (818) 240-0392

This page left intentionally blank.

INITIAL STUDY CHECKLIST
 FY 2018-2019 CDBG, ESG and HOME Programs

1.	Project Title: FY 2018-2019 CDBG, ESG and HOME Programs
2.	Lead Agency Name and Address: City of Glendale Community Development Department Planning Division 633 East Broadway, Room 103 Glendale, CA 91206
3.	Contact Person and Phone Number: Dennis Joe, Planner Tel: (818) 937-8157 Fax: (818) 240-0392
4.	Project Location: Glendale, Los Angeles County, California: Glendale is located northeast of downtown Los Angeles. It is bounded by the cities of Burbank, Pasadena, La Canada Flintridge and the Los Angeles communities of Tujunga, Eagle Rock and Los Feliz.
5.	Project Sponsor's Name and Address: Maggie Kavarian, Senior Community Services Supervisor City of Glendale Community Services and Parks Department 141 N. Glendale Avenue, Room 202 Glendale, CA 91206
6.	General Plan Designation: N/A
7.	Zoning: N/A
8.	Description of the Project: (Describe the whole action involved, including but not limited to, later phases of the project, and any secondary support or off-site features necessary for its implementation.) Action Plan prepared by the City of Glendale Community Services and Parks Department for the fiscal year 2018-2019 Community Development Block Grant (CDBG), Emergency Solutions Grant (ESG), and HOME programs. See attached Action Plan for full description.
9.	Surrounding Land Uses and Setting: The projects are located throughout the City of Glendale, and as such the surrounding uses vary depending on location. A discussion of the surrounding land uses for community improvements projects will be disclosed during the separate environmental review for each project when necessary.
10.	Other public agencies whose approval is required (e.g., permits, financing approval or participation agreement). Department of Housing and Urban Development (HUD)

11. Environmental Factors Potentially Affected:

The environmental factors checked below would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact," as indicated by the checklist on the following pages.

- | | | |
|---|--|---|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Agricultural and Forest Resources | <input type="checkbox"/> Air Quality |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Geology / Soils |
| <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Hydrology / Water Quality |
| <input type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Mineral Resources | <input type="checkbox"/> Noise |
| <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Public Services | <input type="checkbox"/> Recreation |
| <input type="checkbox"/> Transportation / Traffic | <input type="checkbox"/> Utilities / Service Systems | <input type="checkbox"/> Mandatory Findings of Significance |

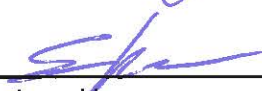

LEAD AGENCY DETERMINATION:

On the basis of this initial evaluation:

- I find that the proposed project **COULD NOT** have a significant effect on the environment, and a **NEGATIVE DECLARATION** will be prepared.
- I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project have been made by or agreed to by the project proponent. A **MITIGATED NEGATIVE DECLARATION** will be prepared.
- I find that the proposed project **MAY** have a significant effect on the environment, and an **ENVIRONMENTAL IMPACT REPORT** is required.
- I find that the proposed project **MAY** have a "potentially significant impact" or "potentially significant unless mitigated" impact on the environment, but at least one effect 1) has been adequately analyzed in an earlier document pursuant to applicable legal standards, and 2) has been addressed by mitigation measures based on the earlier analysis as described on attached sheets. An **ENVIRONMENTAL IMPACT REPORT** is required, but it must analyze only the effects that remain to be addressed.
- I find that although the proposed project could have a significant effect on the environment, because all potentially significant effects (a) have been analyzed adequately in an earlier EIR or **NEGATIVE DECLARATION** pursuant to applicable standards, and (b) have been avoided or mitigated pursuant to that earlier EIR or **NEGATIVE DECLARATION**, including revisions or mitigation measures that are imposed upon the proposed project, nothing further is required.

12. Environmental Factors Potentially Affected:

The following section provides an evaluation of the impact categories and questions contained in the checklist and identifies mitigation measures, if applicable.

A. AESTHETICS

<i>Would the project.</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Have a substantial adverse effect on a scenic vista?				X
2. Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings, and historic buildings within a state scenic highway?				X
3. Substantially degrade the existing visual character or quality of the site and its surroundings?				X
4. Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?				X

Comments to Sections A(1), (2), (3), and (4):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on aesthetics as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect scenic vistas, damage scenic resources, degrade the visual character of any sites or create substantial light or glare.

Potential aesthetic impacts could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

B. AGRICULTURE AND FOREST RESOURCES

<p><i>In determining whether impacts to agricultural resources are significant environmental effects, lead agencies may refer to the California Agricultural Land Evaluation and Site Assessment Model (1997) prepared by the California Department of Conservation as an optional model to use in assessing impacts on agriculture and farmland. Would the project. In determining whether impacts to forest resources, including timberland, are significant environmental effects, lead agencies may refer to information compiled by the California Department of Forestry and Fire Protection regarding the state's inventory of forest land, including the Forest and Range Assessment Project and the Forest Legacy Assessment project; and the forest carbon measurement methodology provided in the Forest Protocols adopted by the California Air Resources Board. Would the project:</i></p>	<p>Potentially Significant Impact</p>	<p>Less Than Significant Impact With Mitigation Incorporated</p>	<p>Less Than Significant Impact</p>	<p>No Impact</p>
<p>1. Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?</p>				<p>X</p>
<p>2. Conflict with existing zoning for agricultural use, or a Williamson Act contract?</p>				<p>X</p>
<p>3. Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)) or timberland (as defined in Public Resources Code section 4526)?</p>				<p>X</p>
<p>4. Result in the loss of forest land or conversion of forest land to non-forest use?</p>				<p>X</p>
<p>5. Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use or conversion of forest land to non-forest use?</p>				<p>X</p>

Comments to Sections B(1), (2), (3), (4) and (5):

The City of Glendale does not contain any agricultural resources or lands currently zoned for agricultural uses; instead, Glendale is an urbanized area with a mixture of commercial, residential and industrial uses. Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs would not have a negative impact on agricultural resources largely because there is no "prime farmland," "unique farmland" or "farmland of statewide importance" that could be converted to non-agricultural use; no existing zoning for agricultural use or Williamson Act contracts; and no farmland that could be converted to non-agricultural use. There is no existing zoning of forest land or timberland in the City of Glendale. No forest land could be converted to non-forest use under the proposed project.

Mitigation Measures: No mitigation measures are required.

C. AIR QUALITY

<i>Where available, the significance criteria established by the applicable air quality management or air pollution control district may be relied upon to make the following determinations. Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Conflict with or obstruct implementation of the applicable air quality plan?				X
2. Violate any air quality standard or contribute substantially to an existing or projected air quality violation?				X
3. Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?				X
4. Expose sensitive receptors to substantial pollutant concentrations?				X
5. Create objectionable odors affecting a substantial number of people?				X

Comments to Sections C(1), (2), (3), (4), (5) and (6):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on air quality as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect air quality.

Potential air quality impacts could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

D. BIOLOGICAL RESOURCES

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X
2. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U.S. Fish and Wildlife Service?				X

Would the project:	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
3. Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?				X
4. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?				X
5. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?				X
6. Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan?				X

Comments to Sections D(1), (2), (3), (4), (5) and (6):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on biological resources as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect biological resources.

Potential impacts on biological resources could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

E. CULTURAL RESOURCES

Would the project:	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Cause a substantial adverse change in the significance of a historical resource as defined in CEQA Guidelines §15064.5?				X
2. Cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines §15064.5?				X
3. Directly or indirectly destroy a unique paleontological resource or site or unique geologic feature?				X

Would the project:	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
4. Disturb any human remains, including those interred outside of formal cemeteries?				X

Comments to Sections E(1), (2), (3) and (4):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on cultural resources as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect cultural resources.

Potential impacts on cultural resources could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

F. GEOLOGY AND SOILS

Would the project:	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:				
i) Rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? Refer to Division of Mines and Geology Special Publication 42.				X
ii) Strong seismic ground shaking?				X
iii) Seismic-related ground failure, including liquefaction?				X
iv) Landslides?				X
2. Result in substantial soil erosion or the loss of topsoil?				X
3. Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?				X
4. Be located on expansive soil, as defined in Table 18-1-B of the California Building Code (2001), creating substantial risks to life or property?				X

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
5. Have soils incapable of adequately supporting the use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?				X

Comments to Sections F(1)(i)(ii)(iii)(iv), (2), (3), (4) and (5):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with geology and soils as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect geology and soils.

Potential impacts associated with geology and soils could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

G. GREENHOUSE GAS EMISSIONS

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?				X
2. Conflict with any applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of greenhouse gases?				X

Comments to Sections E(1), (2), (3) and (4):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with greenhouse gases as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect geology and soils.

Potential impacts associated with greenhouse gases could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

H. HAZARDS AND HAZARDOUS MATERIALS

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?				X
2. Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?				X
3. Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?				X
4. Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?				X
5. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project site?				X
6. For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project site?				X
7. Impair implementation of or physically interfere with an adopted emergency response plan or emergency evacuation plan?				X
8. Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?				X

Comments to Sections H(1), (2), (3), (4), (5), (6), (7) and (8):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with hazards and hazardous materials as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect hazards and hazardous materials.

Potential impacts associated with hazards and hazardous materials could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

I. HYDROLOGY AND WATER QUALITY

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Violate any water quality standards or waste discharge requirements?				X
2. Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?				X
3. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of stream or river, in a manner which would result in substantial erosion or siltation on- or off-site?				X
4. Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner which would result in flooding on- or off-site?				X
5. Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?				X
6. Otherwise substantially degrade water quality?				X
7. Place housing within a 100-year flood hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?				X
8. Place within a 100-year flood hazard area structures which would impede or redirect flood flows?				X
9. Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam?				X
10. Inundation by seiche, tsunami, or mudflow?				X

Comments to Sections I(1), (2), (3), (4), (5), (6), (7), (8), (9) and (10):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with hydrology and water quality as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect hydrology and water quality.

Potential impacts associated with hydrology and water quality could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects

would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

J. LAND USE AND PLANNING

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Physically divide an established community?				X
2. Conflict with any applicable land use plan, policy, or regulation of an agency with jurisdiction over the project (including, but not limited to the general plan, specific plan, local coastal program, or zoning ordinance) adopted for the purpose of avoiding or mitigating an environmental effect?				X
3. Conflict with any applicable habitat conservation plan or natural community conservation plan?				X

Comments to Sections J(1), (2) and (3):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with land use and planning as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. The majority of the programs are included in the City's updated Housing Element adopted in January 2014. As such, these programs would not adversely affect land use and planning.

Potential impacts associated with land use and planning could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

K. MINERAL RESOURCES

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?				X
2. Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?				X

Comments to Sections K(1) and (2):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with the availability of know mineral resources as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect mineral resources.

Potential impacts associated with the availability of know mineral resources could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

L. NOISE

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?				X
2. Exposure of persons to or generation of excessive groundborne vibration or groundborne noise levels?				X
3. A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?				X
4. A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?				X
5. For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project site to excessive noise levels?				X
6. For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project site to excessive noise levels?				X

Comments to Sections L(1), (2), (3), (4), (5) and (6):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with noise as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect noise.

Potential impacts associated with noise could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

M. POPULATION AND HOUSING

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?				X
2. Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?				X
3. Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?				X

Comments to Sections M(1), (2) and (3):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with population and housing as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect population and housing.

Potential impacts associated with population and housing could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

N. PUBLIC SERVICES

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
a) Fire protection?				X
b) Police protection?				X
c) Schools?				X
d) Parks?				X
e) Other public facilities?				X

Comments to Sections N(1)(a),(b), (c), (d) and (e):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact associated with public services as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect public services.

Potential impacts associated with public services could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

O. RECREATION

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Would the project increase the use of existing neighborhood and regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?				X
2. Does the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?				X

Comments to Sections O(1) and (2):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on recreational facilities as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect recreational uses. Conversely, the proposed programs included in the action plan would help to relieve existing pressure on the recreational facilities by providing after school programs away from park sites.

Potential impacts on recreational facilities could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

P. TRANSPORTATION/TRAFFIC

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Exceed the capacity of the existing circulation system, based on an applicable measure of effectiveness (as designated in a general plan policy, ordinance, etc.), taking into account all relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?				X
2. Conflict with an applicable congestion management program including, but not limited to level of service standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?				X
3. Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?				X
4. Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g., farm equipment)?				X
5. Result in inadequate emergency access?				X
6. Conflict with adopted policies, plans, or programs supporting alternative transportation (e.g., bus turnouts, bicycle racks)?				X

Comments to Sections P(1), (2), (3), (4), (5), (6) and (7):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on traffic and transportation as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect traffic and transportation.

Potential impacts associated with traffic and transportation could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

Q. UTILITIES AND SERVICE SYSTEMS

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?				X
2. Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				X
3. Require or result in the construction of new storm water drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?				X
4. Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?				X
5. Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?				X
6. Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				X
7. Comply with federal, state, and local statutes and regulations related to solid waste?				X

Comments to Sections Q(1), (2), (3), (4), (5), (6) and (7):

Implementation of the action plan prepared for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to have a negative impact on utilities and service systems as the majority of the projects involve public social service programs that do not propose physical changes to the existing built environment. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs would not adversely affect utilities and service systems.

Potential impacts on utilities and service systems could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.

Mitigation Measures: No mitigation measures are required.

R. MANDATORY FINDINGS OF SIGNIFICANCE

<i>Would the project:</i>	Potentially Significant Impact	Less Than Significant Impact With Mitigation Incorporated	Less Than Significant Impact	No Impact
1. Does the project have the potential to degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal or eliminate important examples of the major periods of California history or prehistory?				X
2. Does the project have impacts that are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, the effects of other current projects, and the effects of probable future projects)?				X
3. Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?				X

Comments to Sections R(1), (2) and (3):

Implementation of the action plan for the FY 2018-2019 CDBG, ESG and HOME programs is not anticipated to degrade biological resources or the overall quality of the natural environment in Glendale; eliminate important historic or prehistoric resources; have environmental effects causing substantial adverse effects on humans; or have cumulatively considerable impacts. In addition, the majority represent a continuation of existing programs that are not proposed to expand. As such, these programs are not considered cumulatively considerable.

Potential impacts could result from capital and neighborhood improvement projects that are also part of the action plan. However, these projects would be evaluated in subsequent project-specific environmental review under CEQA when specific project data becomes available.
