

The City of Glendale wants you to be

Waste-Free for Back-to-School!

When we all pitch in to recycle right and reduce waste, everyone in our schools benefits and we can create a sustainable community.

PURCHASE

recycled, environmentally friendly school supplies. Look for items that use minimal packaging and are made from recycled material.

DONATE

old clothes and school supplies. Old school outfits and supplies end up sitting inside your closet. Donating them to local organizations extends their life and reduces waste in landfills.

BRING

your lunch in a reusable lunch bag or box. Skip the brown paper lunch bag and plastic baggies.

Recycling and reducing waste is easy. Be a

Back-to-School hero

and encourage fellow teachers, students, and parents to help conserve our resources, prevent pollution, and create a sustainable Back-to-School environment.
