<i>Description: I will need 1 oak tree in the front of our property removed since it has died and poses a potential safety risk from root/branch failure.</i>							
<i>We noted the tree to be rapidly declining in health 2 months ago. A certified arborist, Jonathan Flournoy, with Carl Mellinger Consulting inspected the tree on 9/16. The tree was noted to have a fungal infection (multiple conks at base of tree, likely ganoderma) with significant decay to the trunk. Over the past month the tree has continued to decline in health with all leaves turning on brown. We are concerned that a branch or the entire tree will fall down.</i>

PERMITS ISSUED BY TYPE (11/01/2022 TO 11/30/2022)

Permit #	Type	Workclass	Status	Main Address	Project	District	Parcel
	<i>Application Date</i>	<i>Issue Date</i>	<i>Expiration</i>	<i>Last Inspection</i>	<i>Final Date</i>		
	<i>Zone</i>	<i>Sq Ft</i>	<i>Valuation</i>	<i>Fee Total</i>	<i>Assigned To</i>		

Description: Permit granted to REMOVE (1) Platanus racemosa due to decay in root plate and root damage to structure, where mitigation would leave tree structurally unsound. Applicant agreed to plant (1) replacement tree of the same species within 45 days of permit issuance (1-4-23)

Significant safety concerns for the following reason:

1- *The tree in question is tilting from the base towards the house due to recent rain, wind, etc.*

The roots of the tree are lifting. Please see pictures. Because the tree is leaning the roots have lifted significantly on one side. This is concerning! The base of the tree is shifting and leaning towards the house. Please see pictures which shows the angle of the base. There is a significant concern because from the time that we moved into our house the angle of the tree from the base has been leaning more towards our house. More so now due to high winds and soil saturation. It is a matter of time before this tree will collapse into our home due to the significant weight that it has leaning towards one direction. The tree is tall enough to completely destroy my kids room where they sleep and our living room where we gather most of the time.

There is a significant safety concern for my family and myself due to how close the tree is to house and the leaning of the base of the tree towards the house. Although heartbreaking, this tree has to be removed immediately before it damages my home and/or causes injury to my family.

2- *The tree in question is growing towards the house.*

The tree is growing towards and into the roof of the house, as you can see from the pictures. Specifically, towards the kids' room and the living room.

This is creating an imminent and significant safety concern for my family and myself. It is just a matter of time before this tree grows into my house.

3- *The roots of the tree are invading the foundation and/or the plumbing of the house.*

As you can see with the pictures provided the roots are in and around the foundation of the house. The roots have invaded my foundation which compromises my house.

More so the roots are destroying my landscape, interfering with drainage as water builds in my foundation leaving heavy water marks in my foundation concrete, and interfering with hardscaping that area. Please see photos.

Due to this grave concern this tree has to be removed immediately to remediate the imminent and ongoing damages that it is causing to my property and the safety concerns to my family.
