<p><i>Description: Permit ISSUED to remove and replace (2) Quercus agrifolia, due to findings of an arborist report regarding inviability. Both trees are young coast live oaks (Quercus agrifolia), with Tree PL10's trunk measuring 10.5 inches diameter and Tree PL46 measuring 6 inches diameter. They are both located on the southern property line and growing under high voltage power lines. Tree PL10 is growing very close to a power pole, while Tree PL46 has a significant lean to the south over a neighboring property. After considering the locations of trees PL10 and PL46, and the implications for the applicant's perimeter fencing project and future management of the trees, it is my opinion that both trees are inappropriately located and that it is justifiable to remove them now before they grow larger and become an issue.</i></p>
